PRINCESS ANNE, MD.

Dear Friends:

It seems we get so few opportunities to see our patrons personally so as to discuss things in general that when the time comes to write a letter such as this there is so much to discuss we just don't know where to start and leave off. Right now, for instance, some of you are wanting to know why we did this and why we did not do that last Spring during the shipping season and want to know how the stock is for this year and what the prices are going to be and if we are going to try and give better service and stock this year. We are wanting to know how the stock which you purchased last year did for you and if you are going to plant this Fall and next Spring and above all if you are considering buying your trees and plants from the Bountiful Ridge Nurseries.

We are proud of the fact that we made many new customers last Spring and are proud of the loyalty shown by our old customers. Our Nursery will continue to expand with such loyal support from you and we are surely going to try to grow stock and give service in the future which will justify your continued support. We were compelled to do many things we did not like to do during the past Spring but try as we did we could hardly cope with existing weather conditions at times during the shipping season. We do not approve of Winter storage for fruit trees and naturally we must depend on digging our stock during the Spring months. We had one of the most severe Winters we have experienced in many years which did not permit us to start our digging at the usual time. Following the thaw up it rained almost constantly for several weeks which made it impossible at times to get into the fields to dig trees. We often ran our tree digger when the water was running down the rows behind the tractor and it was necessary that every man wear boots so as to pull the trees from the rows. We hired many extra men and worked when it was not fit for anyone to work in an effort to try and get our shipments out on time. We just could not do it in some cases but we surely did the best we could and we appreciate the spirit of understanding shown by many and hope that those who became impatient are now getting satisfactory results from the stock shipped them. These unusual difficulties showed us some weak links in our chain of service which we are going to try and strengthen for we want everyone who deals with us satisfied. We hope you do not expect the impossible, something you would not be willing to give or do yourself, for we are sure that you are often brought under the same difficulties only possibly in a different way. We know we are not perfect and make mistakes at times for we are human. We wish, however, to profit by our mistakes so that they will not reoccur and we hope that you will cooperate to that end.

Our favorable location again proved its real advantages during the past Winter when so much damage was done in other sections of the Country to growing Nursery Stock by extremely low temperatures. We did not experience any damage to our growing stock and as a consequence we have a very fine lot of trees and plants to offer for this Fall and next Spring's shipment. There is a great shortage of Apple, Plum and Cherry in two year trees with a fair supply of one year trees. The shortage is not quite so acute with Peach trees but if the trees were replanted that were killed during the past Fall and Winter by the storm which swept the Eastern Seaboard last August and by the low temperatures of last Winter, there would not be enough Peach Trees in the Nurseries to go around.

We have given a great deal of consideration to prices for this Fall, and if we would follow the practice of other merchandising firms when a shortage exists on certain commodities, we would advance them materially. Our running expenses have naturally increased during the past eighteen months, which necessitates some advance in our prices, but in all cases we have tried to limit these advances as much as possible, tree fruits being about the only items which we have advanced in price. We have advanced our prices very little, putting them where we believe them to be fair to both of us in an effort to co-operate with our patrons, giving the results of our years of experience, giving stock we believe to be as good as money can buy regardless of price. We have dealt with you enough to believe you will appreciate this and will again look to us for your trees which you will want to plant this Fall and next Spring, and if you do we shall certainly try to justify your continued confidence.

Very truly yours,
BOUNTIFUL RIDGE NURSERIES

Homer Kemh

We Again Submit the Following Varieties of Fruits for the Approval of the Practical Fruit Grower

**They Have Been Tried Under Varied Conditions.
We Feel They Should Have A Place in Every Orchard.**

EARLY McINTOSH: Typical McIntosh in appearance; not quite so good quality, ripening about DUCHESS season or six to eight weeks before regular McIntosh. Extremely thrifty and good cropper.

MILTON: Typical McIntosh, coloring full red; very good quality, about equal to McIntosh, being same textured apple. Tree not as vigorous as Early McIntosh. Ripens three to four weeks before McIntosh or just before Wealthy.

MELBA: Truly a McIntosh in quality and appearance, only more flat in shape, ripening a week before McIntosh. Drops badly before coloring as it should in southern districts. Vigorous tree.

LOBO: Same season as the McIntosh, larger apple, and colors a more full red than the regular McIntosh before dropping. Extra good quality. Tree equal to McIntosh. Comes recommended highly to replace the regular McIntosh for the Middle Atlantic and Southern growers.

McINTOSH RED: We have improved our strain of McIntosh through bud selection and are able to offer our patrons trees which have reproduced a solid red McIntosh type of fruit. Other Nurseries are offering these at advanced prices. We made our bud selections more than six years ago and are pleased to give our patrons the advantage of this improved McIntosh without additional cost.

CORTLAND: A cross between Ben Davis and McIntosh, ripening two to four weeks later than McIntosh. About equal in size, colors well, same textured fruit, but not quite as good quality. **IT'S MAIN QUALITY IS THAT IT HANGS TO THE TREE 'TILL IT IS WELL COLORED AND WILL SELL AS McINTOSH ON THE MARKETS.**

MACOUN: Very highly colored, having no stripe. Same quality as McIntosh, same textured fruit, hangs to tree better than McIntosh, and ripens two to three weeks after Cortland. Tree about equal to McIntosh, a regular bearer, and strongly recommended to lengthen the McIntosh season and give the Middle Atlantic and Southern growers a McIntosh type fruit they can grow successfully. **FOR THE FIRST TIME SINCE LISTING THE MACOUN VARIETY WE BELIEVE WE HAVE AN AMPLE SUPPLY OF EXCEPTIONALLY FINE ONE YEAR OLD TREES OF THIS VARIETY. OUR SUPPLY OF TWO YEAR OLD TREES IS AGAIN LIMITED. NO GROWER OF THE McINTOSH TYPE OF FRUIT CAN IGNORE THE MERITS OF THIS MOST EXCELLENT VARIETY.**

Golden Jubilee Peach

**A Development of the New Jersey
Experimental Station**

The Outstanding Peach of All Recent Introductions

A HIGH QUALITY, EARLY, YELLOW, FREESTONE PEACH. THE VALUE OF THIS PEACH TO EASTERN AND SOUTHERN GROWERS CANNOT BE ESTIMATED. A TYPICAL ELBERTA TYPE FRUIT, HIGHLY COLORED, RIPENING BEFORE CARMAN OR ABOUT FOUR WEEKS BEFORE THE REGULAR ELBERTA.

The GOLDEN JUBILEE reaches its highest state of perfection on light sandy soil, where the elevation is not too great.

TO THE SOUTHERN PLANTERS WE WISH TO SAY: You are letting millions of dollars pass by you by not planting this variety of peach more extensively. You would be able to harvest this peach and market them with no competition from any other section. "THE FIRST YELLOW FREESTONE, HIGH QUALITY PEACH TO GO ON THE MARKET."

TO THE NORTHERN GROWER WE WISH TO SAY: THAT EVERY MAN KNOWS THE VALUE OF A PEACH OF THIS SEASON. A PEACH WHICH WILL ENABLE HIM TO GO ON ANY MARKET AND COMPETE WITH SOUTHERN PEACHES AND GET A PAYING PRICE FOR THEM.

The Golden Jubilee is a second generation seedling of the Elberta crossed with the Greensboro. The tree is unusually hardy. The buds resist winter freezes well and open after Elberta, which insures a regular crop. The blossoms are self-fertile. The peach is medium to large size and firm. It has proven a good shipper. **WE RECOMMEND IT TO BE PLANTED ANY PLACE WHERE OTHER PEACHES CAN BE GROWN SUCCESSFULLY.**

We offer this splendid variety at no advanced price. We were the first Nursery to offer it to the planting public generally. We have distributed more trees of it than all other Nurseries combined. We are growing more today than any other Nursery in the U. S. If you are wanting genuine Golden Jubilee Peach Trees come to the BOUNTIFUL RIDGE NURSERIES for them. This splendid variety will be reproduced in actual color in our 1935 catalog.

FIRST OFFERED BY US FALL SHIPPING SEASON 1928.

PLANTED AND PRODUCING IN EVERY PEACH GROWING SECTION OF THE U. S.

THE REAL VALUE OF THE GOLDEN JUBILEE BECOMES MORE PRO-
NOUNCED EACH YEAR. INCREASING SALES EACH YEAR INDICATE
THE PLANTERS ARE AWAKENING TO THIS REALIZATION.

OUR CONFIDENCE IN THE PEACH IS JUSTIFIED.
IT STANDS WITHOUT AN EQUAL FOR ITS SEASON.

THE RED ROME BEAUTY SPORTS GALLIA BEAUTY - OHIO RED ROME - DARK RED ROME

WE FIRST OFFERED THESE IMPROVED ROME BEAUTY TYPES TO THE PLANTERS SPRING SEASON OF 1929. THEY HAVE NOW BEEN TRIED AND THEIR SUPERIORITY PROVEN IN PRACTICALLY EVERY SECTION OF THE U. S. WHERE THE ROME BEAUTY TYPE OF FRUIT WILL THRIVE. AGAIN OUR CONFIDENCE IN NEW VARIETIES HAS BEEN JUSTIFIED AND WE BELIEVE OUR DISTRIBUTION OF THESE VARIETIES WILL MEAN THOUSANDS AND THOUSANDS OF DOLLARS IN ADDED PROFITS TO THE FRUIT GROWERS. As they come into production in various sections their real value becomes more and more pronounced and no grower of the Rome Beauty type of apple can afford to be without these improved varieties. The Gallia Beauty and Ohio Red Rome are proving to be superior to other Red Rome types in the East. The Dark Red Rome comes to its highest state of perfection on light sandy soils and when planted at a high elevation. We are constantly on the alert for new and improved varieties and we hope in this way to improve the standard of the fruit growing industry.

BLAXTAYMAN

(Trade-Mark)

Just the apple the fruit growers have been wanting for years. A full bright red apple with the same quality as the famous Staymans Winesap.

NO ONE CAN QUESTION THE POPULARITY OF THE STAYMANS WINESAP ON THE MARKETS AND LACK OF COLOR WAS IT'S CHIEF FAULT. NOW THIS HAS BEEN OVERCOME WITH THE INTRODUCTION OF THE BLAXTAYMAN. THE COLOR IS EQUAL TO THE SOLID RED OF THE JONATHAN AND THE TREES AND BUDS HAVE THE SAME HARDY CHARACTERISTICS AS THE OLD STAYMANS.

No grower can afford to pass up these tried and proven new sports we are offering. They will mean added profits to them in the future. They can be compared with a new model automobile, the same dependable tree with an improved finished product. The fruit of these new varieties with its increased color will sell for more money and you will be able to sell it when the older, poorer colored type of the same varieties will be a drag on the markets. PREPARE TO GIVE THE CONSUMING PUBLIC THE BEST WITHOUT ANY ADDED EXPENSE TO YOU. The difference in price of the tree will be realized from the sale of the first bushel of fruit harvested. Every alert grower should readily see the many advantages of these improved fruits and plant this year for the future markets and bring his orchard up to date. Because of the extremely heavy sale on Blaxtayman last spring our supply is very limited this year.

Prices: RICHARED DELICIOUS BLAXTAYMAN

These Prices are for Fall of 1934.

WE ARE MAINTAINING THE SAME PRICE LEVEL ON OUR LEADING FRUITS

ONE YEAR

	1-11	12-24	25-49	50-99	100-499

3-4½ ft., 2 yr., 8-9-16 in.....	.60	.50	.40	.30	.20

NOTICE

The universal demand for these phenomenal sports of two of the most popular apples in production today has absorbed our supply of trees each year to such an extent that we have very few two year old trees to offer this year. We have, however, many thousands of excellent one year old trees which we feel will fill every planter's expectation. Please do not order large quantities of two year old trees of either variety.

FALL PLANTING

Our years of experience in the Nursery and orchard business has taught us that every one should do their planting in the FALL, wherever it is possible for them to do so and their climatic conditions are not too severe and where they can secure well matured stock to plant. We do not recommend that plantings be made on land which is inclined to heave from the effects of frost unless the plants can be heavily mulched or are protected by drawing a mound of earth about them to help hold them. We do especially recommend the planting of fruit and shade trees and small berry plants except Strawberry plants. The roots will heal where cut when dug, the winter rains will settle the dirt well about the roots, the tree will be ready to start with the first movement of sap in the spring and you will have 25% more growth and almost a perfect stand on the planting. Then too you will have more time to make the planting in the fall after you have harvested your fruit and are awaiting pruning time. By fall planting time we mean any time that the ground is not frozen during fall and winter months. If you get a cold snap and then it warm up go ahead and do your planting but in late planting be sure and finish each tree as it is planted and draw a mound of earth about it 12 inches high to protect it against swaying by winter winds. In all cases where fall planting is done do not trim your trees 'till spring. Remember it is essential that the stock be well matured and if you are dealing with the right kind of a nursery they won't ship 'till the stock is right.

OUR STOCK SOLD TO ORCHARISTS LAST FALL PROVED ITS HARDINESS IN NEARLY ALL SECTIONS OF THE COUNTRY WHERE IT WAS GIVEN PROPER CARE BY COMING THROUGH THE LOW TEMPERATURES OF LAST WINTER WITH NO MATERIAL DAMAGE. THIS PROVES THE VALUE OF RECEIVING WELL GROWN, AND WELL MATURED TREES SUCH AS WE GROW AND DELIVER.

RICHARED

TRADEMARK REG. U. S. PAT. OFF.

The DELICIOUS Supreme

The DELICIOUS APPLE is conceded to be the most popular variety in cultivation today and it leads in giving to the apple industry new and improved bud variations. The RICHARED, in our estimation, is one of the best now being offered by the various nurseries in the U. S. The color may not be as dark as some others but the clear bright red completely covering the fruit before it actually matures should make it the favorite. It is past the experimental stage now and is fruiting generally in the U. S. and has proven itself to be just what we claim.

Think of the increased profits such an apple would give to you for you can grade out practically 100% extra fancy fruit with the RICHARED DELICIOUS. The tree characteristics are the same as the old Delicious but the apple is a clear bright red. You can pick it earlier; you can keep it longer; you can ship it to distant markets more successfully; you have no loss from drop apples and you have an apple that will sell more readily on any market. YOU HAVE AN APPLE THAT WILL SELL AT AN ADVANCED PRICE AT ALL TIMES OVER THE OLD DELICIOUS. Considering these points of merit we say without hesitation that anyone desiring the Delicious type of fruit should plant the RICHARED DELICIOUS.

Health, Profitable and Permanent Investment, Beautiful Surroundings and Happiness

Are All to Be Had By The Judicious Planting of Bountiful Ridge Nursery Grown Fruits and Ornamentals

INFORMATION

We have always tried to give our friends the plain facts in regard to the trees which we sell them and about general conditions which existed in the Nursery industry so that they could judge for themselves the best policy to pursue in the purchase of their stock. We grow most of the fruit trees and other stock which we offer our customers in our main nursery located in Somerset County, Maryland, however, there are certain items which can be grown to a better advantage in other sections of the Country and because of our desire to give our patrons the best it is possible to grow, we have these items grown for us by responsible Nurseries in sections where they can be grown the best. They are grown under our supervision and they must meet the standards of Sweet Cherry and for this reason we have the majority of our Cherry Trees grown for us by responsible Nurseries in New York State. Practically every Sweet Cherry in New England and the Central West where they grow Sweet Cherry Trees was damaged to such an extent by the low temperatures of the past Winter that it was necessary to cut the one year old trees, which usually develop into two year old trees, back to the ground. They are making a splendid growth this Summer but will have to be marketed as one year old trees, and very few, if any, two year old Sweet Cherry can be offered the planters this year. There was not much damage done to Sour Cherry Trees, therefore, two year stock will be available in the Sour Cherry varieties. We ask our patrons to consider these facts when ordering Cherry Trees.

APPLE TREES

Owing to the unusual demand for our trees last Spring and curtailed production, we will only be able to offer our patrons one year old trees of certain varieties. OUR SUPPLY OF TWO YEAR OLD TREES IS VERY LIMITED, HAVING ONLY ABOUT FIFTY THOUSAND TREES. Our one year old trees, however, are as fine as we have ever grown and we feel will give results wherever they are planted. We would like for you to give us the privilege of supplying one year old trees where we are unable to fill your order complete with two year old trees, giving you the advantage of any difference which may exist in price. We shall naturally notify you promptly if it is necessary to do this. We ask this in the spirit of fairness so that there will be no misunderstandings. Consider the special varieties which we call to your attention on pages 3 and 4 of this Price List. They cannot help but mean added profits to you if planted judiciously.

Figure your order on apple trees at the following rates: (Prices listed are per tree.)

We can especially recommend all varieties (*) starred. They have been tried and have proven themselves especially desirable and profitable to the planters.

PEACH TREES

We are exceptionally fortunate in having one of the largest lots of Peach Trees to offer the planters to be found in the Nurseries of the East. They are as fine as it is possible to produce and we know them to be absolutely TRUE TO NAME. We would like to have our prospective customers come and look at them for we feel that they would meet their every desire in the way of a high-grade tree. We have over 200,000 trees of the best varieties now in cultivation and released for general propagation. An orchard planted of these trees is your assurance of a successful orchard. No man can afford to gamble on the uncertainty of the trees he wishes to plant this year. The saving of a few dollars by buying inferior trees at a lower price can prove extremely costly. It pays to deal with an established Nursery who is there to serve you from year to year. If you are interested in large quantities, write us before buying elsewhere and give us the opportunity of quoting better prices than elsewhere. You will always find the Bountiful Ridge Nurseries the dependable place to buy your nursery stock both from the standpoint of quality and price. All peach trees are one year old from buds grown on the hardest seedling stock available. They are thoroughly inspected and known to be free from injurious disease.

Champion	.35	.30	.20	.18	.17

One year old Pear Trees were damaged greatly by the low temperatures of last Winter throughout the New England States which makes two year old trees very scarce this year. We have a fair supply of most varieties which are being grown in the Nursery at Princess Anne, although they are not making the usual growth due to the extremely dry weather during July. Pear Trees are not plentiful anywhere this year and we would advise that you make your reservations early.

Rubel	Pioneer
10-12-14	\$1.50 each; \$12.00 per 100

CHATTER

The shortage which existed last year in most all classes of fruit trees is becoming more acute each day as the real damage done to Nursery Stock by the low temperatures of last Winter shows up more and more and the abnormally dry weather in some of the principle tree producing sections becomes more serious. The Nursery industry goes into the Fall shipping season with the **SMALLEST SUPPLY OF FRUIT TREES WHICH HAS EXISTED FOR MORE THAN FIFTEEN YEARS.** The limited supply combined with advancing prices on most all items used in producing Nursery Stock naturally means that prices must advance. Many Nurseries advanced their prices nearly 100% last year. We only advanced our prices from 10 to 20% in an effort to meet the planters half way at what we considered a critical time. We must now advance the prices on most of our stock to protect ourselves on increased production costs, but **AGAIN WE ARE ONLY MAKING A NOMINAL PRICE ADVANCE, FOR WE WISH TO COOPERATE WITH THE PLANTERS SO THAT THEY MAY KEEP THEIR ORCHARDS AND BERRY FIELDS AT FULL PRODUCTION IF DESIRED AND TO ENABLE THOSE CONSIDERING MAKING NEW PLANTINGS TO GO AHEAD WITH THEIR PLANS. WE CANNOT GUARANTEE** the prices listed herein to be effective after December 1st, for we do not know what day we will be called on to change them to conform to some regulation which will be imposed on us.

We have one of the largest quantities of fruit trees to be found among the Nurseries of the East. This is particularly true of **PEACH** and **APPLE** trees. Due to our favorable location we did not experience any injury from last Winter's low temperatures and our trees are making up well at this time in spite of lack of moisture during mid-summer. We have the stock—our prices are fair—you should anticipate your wants for delay may prove costly and disappointing—consider this, place your order or make reservation for the trees you want.

OUR COMPLETE PRICE LIST FOR FALL 1934
CONSTRUCTED TO MEET THE DEMANDS OF OUR PATRONS

PERSONAL SERVICE - DEPENDABILITY

5% DISCOUNT FOR CASH

With Order on All Orders Received Before January 1st, 1935

All orders of \$50.00 or more Shipped Prepaid if within 500 Miles of Nursery

We have been compelled to withdraw our usual offer of 10% discount this year and now offer you 5% discount for cash with your order. This still represents a great saving to you and is the best we can do under existing circumstances. We are, however, trying to give you better values for your money than you can secure from any other Nursery by not advancing our prices very much and giving you stock as good as it is possible to grow. We are giving our Nursery personal supervision which is so very essential in order to deliver you good stock. We are **GIVING PROMPT TRUCK DELIVERY TO IMPROVE OUR SERVICE WHERE POSSIBLE AND PRACTICAL TO DO SO.** This means delivery of the trees to your farm in less than 48 hours after they are dug from the ground. We are constantly trying to strengthen the weak links in our chain of **SERVICE** and you will find the Kemp boys have a deep personal interest in every patron of theirs and want to and will cooperate with you in every way possible to make your purchasing our stock a pleasant task and your plantings a success. Each of us are a tiny cog in Life's great plan; one is essential to the other. We need your patronage for our future success. You should have our products to make your home a place of beauty and profit. We ask for your order this year and we shall do all we can to justify your confidence in placing your order in our care. Place your order while our assortment of varieties and grades are complete.
